

# XL-140

## Geotechnical Drill Rig

Fraste's most popular Multidrill model, the XL-140 is all about having the power to go deep. Powered by a 148hp CAT engine, the XL-140 gives drillers over 11,000 ft lb of torque – plenty of power to get you through the most challenging conditions. More importantly, the XL-140 is all about flexibility. With power to spare, the XL-140 handles large diameter drilling with ease – opening up entirely new possibilities for drillers.
